canon
extract(brief, corpus)
for each artifact in
topological order, if stale
or a high/blocking note
owner role produces
the stale artifact
(inputs, canon, open notes)
gates of the artifact
magnitude vs limit
returned
passed
rejected
validator
terms, numbers, names, contracts
note to the owner
of the artifact
assemble
the final artifacts
no: next round
independent review
frozen rubric, mechanical verdict
each finding:
instrument defect → fix at the root
escaped regression → gate first, then fix
else → note to the origin
stopping criterion?
yes
